# Obstetric Consultants

Our team of obstetrician-gynecologists has created a group obstetric practice because we feel it is the best and safest way to manage your pregnancy and delivery. You will meet each of us during your prenatal care, so you and your partner will be comfortable and familiar with whomever delivers your baby.

One team member is in the hospital each day covering laboring patients and deliveries, so your scheduled prenatal visits will not be cancelled. There are a variety of morning and afternoon appointments available. We appreciate and respect your time and will guide you through every step of your pregnancy. Our group also has a gynecology practice, so we can continue to provide expert care beyond your pregnancy.
