

One-Year Mentored Research Training Opportunity for Medical Students

REQUEST FOR APPLICATIONS

The [Department of Otolaryngology-Head and Neck Surgery](#) has a T32 Predoctoral Training Program offering medical students a 12-month mentored research experience with opportunities to participate in research on many levels. Students will learn from successful program faculty conducting cutting-edge clinically relevant basic, clinical, and translational research in the auditory, vestibular, olfactory, and communication sciences. In addition, tuition is available for students who wish to take courses in clinical investigation and obtain a master's degree.

Benefits

- Monthly stipend, research-related expenses, and health insurance
- Tuition funding for required courses - including Certificate of Clinical Investigation (CCCI) and Master of Clinical Science in Clinical Investigation (MSCI) degree
- Travel to national meetings
- Multidisciplinary seminars

Applicant Eligibility

- Must be US citizen, US non-citizen national, or US permanent resident and enrolled in a doctoral degree program in medicine in the United States
- Commit to a "year-out" opportunity (e.g., 12-month full-time research training experience)
- Support of a program-approved mentor

Application Packet

Download the [application packet](#), complete and **submit the application by April 2, 2018**.
