

Systems Science for Social Impact Summer Training Institute

Applications are open for the 1st annual [Systems Science for Social Impact](#) Summer Training Institute, to be held at the Brown School at Washington University in St. Louis, from July 29 - August 2, 2019. The co-organizers and principal faculty are **Ross Hammond**, **Douglas Luke**, and **Peter Hovmand**.

At this five-day training, participants will get a hands-on introduction to systems science methods with a focus on three main tracks: **agent-based modeling**, **social network analysis**, and **system dynamics**. Participants will review the major concepts of their chosen track/method, learn analytic best practices, and apply the methods to real-world data. The workshops are designed for faculty from public health, social work and social sciences, advanced graduate students, recent graduates, and professionals.

The application process is open; candidates will be accepted on a rolling basis through July 1, 2019.
