

## 2nd Annual Systems Science for Social Impact Summer Training Institute

Applications are open for the 2nd annual [Systems Science for Social Impact Summer Training Institute](#), to be held at the Brown School from July 27 - 31, 2020.

At this five-day training, participants will get a hands-on introduction to systems science methods with a focus on four main tracks:

- Agent-based Modeling (Ross Hammond, track lead)
- Group Model Building (Jill Kuhlberg, track lead)
- Social Network Analysis (Douglas Luke, track lead)
- System Dynamics (Peter Hovmand, track lead)

Participants will review the major concepts of their chosen track/method, learn analytic best practices, and apply the methods to real-world data. The workshops are designed for faculty, advanced graduate students, recent graduates, and professionals from public health, social work, and social sciences.

The application process is open; candidates will be accepted on a rolling basis through July 1, 2020.

Visit the [Systems Science for Social Impact website](#) or view the [handout](#) for more information, and please share with partners and colleagues who may be interested!
