

Free Course Content for Research Instructors from LabArchives

LabArchives is offering free online course content available in the Classroom & Education version of LabArchives. LabBuilder includes open course content instructors can use in their own courses. LabArchives has hundreds of labs, protocols, and course packs with many suitable to virtual and online course instruction. This [Labs for Online Courses document](#) lists the labs that are suitable for online instruction.

Any of the content in LabBuilder can be copied into an instructor's notebook. The first support article listed below shows how to access the content. Keep in mind, you have to be an instructor in LabArchives to see LabBuilder listed in your Notebook Navigator. When an account is first created, you must choose instructor, student, or researcher. If you chose researcher, but will be instructing and want to see LabBuilder content, then simply contact the support team at support@labarchives.com. Provide them your email address, and let the support team know that you would like to change your role to instructor.

Helpful Information

[Knowledgebase Support Article](#) - Overview on why and how to use LabBuilder

[LabBuilder Course Packs](#) - An informative blog post
