

## Cancer Biology Pathway Program Call for Pre- & Postdoctoral Applications

**Deadline: Friday, June 4, 2021, at 5 p.m.**

The Cancer Biology Pathway provides comprehensive training for those embarking on a career in cancer research to tackle and solve problems that cause significant morbidity and mortality in our country.

### Accepted trainees will receive:

- Stipend support for 2 years
- Didactic coursework
- Clinical shadowing opportunities
- Journal clubs
- Workshops in grant writing, imaging, drug discovery and bioinformatics

### Eligibility

All trainees must:

- Be working with a mentor who is a current Siteman Cancer Center member
- Have the ability to participate in the program for 2 years, starting September 1
- May not be simultaneously supported by an NIH or other federal grant during the program

Predoctoral trainees must be:

- A PhD student working on a cancer biology project (MD/PhD students are not eligible for this pathway)
- Entering their 2nd and 3rd years of graduate training;

Postdoctoral trainees must be:

- Within two years of receiving their PhD at the time of application
- A US citizen or permanent resident

Visit the [Cancer Biology Pathway Predoctoral and Postdoctoral Program website](#) for applications and more program details.

Questions and application documents should be sent to [scc.research.training@gowustl.onmicrosoft.com](mailto:scc.research.training@gowustl.onmicrosoft.com).
